Dev 92319 F/50

Sir,

Sub: Education - Navunda Fisheries School - Raising into Higher Elementary School - Proposals - Part II Scheme - 1951-52 - Submitted - Sanction - Request of -

---

The Assistant Director of Fisheries, Mangalore reports that the local fishermen and the other people of the villages of Navunda, Kirimanjeshwar, Marvanthe, Badakere and Padukone of Coondapur Taluq in South Kanara District, submitted a petition on 15-7-49 requesting to raise the Fisheries School at Navunda into a H.E School. A copy of the petition is enclosed.

2 The Assistant Director of Fisheries, Mangalore reports that there are no Higher Elementary Schools within a radius of five or six miles of the Navunda Fisheries School and that the students who pass out of the school by completing their studies up to V standard sit idle at home and that those who are keenly interested in continuing their studies will have to join the Higher Elementary Schools at Kambadakone and Gangoli which are about six or seven miles from Navunda. It will be a difficult task for the students to walk such a long distance to and fro every day and added to this there are no proper and regular conveyance arrangements to both the above places. The financial position of the fishermen also will not permit them to make arrangements for the stay of their children either at Gangoli or at Kambadakone for continuing thier Higher Elementary education.

3 The Deputy Director of Fisheries (South) reports that the President of the school committee has requested to raise the status of the school into that of a Higher Elementary one and open standard VI in June 1950 itself. The Divisional Inspector of Schools has accorded permission for the opening of Standard VI in the Navunda Fisheries school from the school year 1950-51 itself but this was not possible as the proposal was received late from the Deputy Director of Fisheries (South). If the school is raised into a Higher Elementary school it will serve the four lower elementary feeder schools of the neighbouring villages from which admissions to the Higher Elementary classes may be expected. I enclose herewith a statement showing the strength and average attendance of the feeder schools to the Navunda school and also a statement showing the strength and average attendance of the schools for March 1950 to June 1950. The strength of 162 in June 1950 of the above statement consists of 123 fisher children and 39 non-fisher children as given in the annexure appended herewith.

4 I enclose herewith a statement showing the class war strength that is expected in the event of the opening of standard VI in the Navunda Fisheries school in June 1950. It will be seen from the figures furnished in the statement that standards I & II each require bifurcation and to be put in charge of four teachers of Higher Elementary grade and that standards III to V require a teacher each of Higher Elementary grade and that standard VI requires a Secondary grade teacher. Altogether seven Higher Elementary grade teachers and one secondary grade teacher will be required for the

P.T.O.

year 1951-52. There is however sanction for one Secondary grade teacher and four Higher Elementary grade teachers. An additional staff of three more Higher Elementary grade teachers is needed

The Deputy Director of Fisheries (South) reports that when standard VI is opened, the school has to be provided with additional accommodation and that separate proposals will be submitted when the scheme is sanctioned.

I enclose herewith a statement showing the financial implications of the proposal.

I, therefore, request that government may be pleased to treat the proposal of the opening of Standard VI in the Fisheries School at Navunda as a Part II scheme for 1951-52 and accord necessary sanction.

for Director of Fisheries.

cs/6- 9.

Annexure I

Copy of the humble petition of the Fisherk Folk and the other public of the villages of Navunda, Kirimanjeshwar, Marvanthe, Badakere, and Padukone.

We the fisher-folk and other villagers of the villages of Navunda Kirimanjeshwar, Marvanthe, Badakere, Padukone and represent the following with the firm hope that you will kindly concede to our prayer.

There are at present 8 or 9 Lower Elementary schools for these six villages. The strength of these schools in all is about 600. The population of these six villages is about 12000 and the number of schoolgoing children in these is about 2000 out of which at present only 600 are attending. There is not even one higher elementary school for all these children and none of these prosecute their studies above the 5th class, excepting rarely one of two children of the rich, forward communities who go to Middle school at Byndoor or the high school at Gangolli or Coondapoor, the former 8 or 9 miles and the latter 6 or 7 miles from this centre.

This is a centre where the majority of the population is of the backward communities. Among our fold none has received an education above the 5th standard, though the fisheries school of Navunda and Kirimanjeshwar came into existence some 17 or 18 years ago, specially for the fisher folk. This clearly shows the poverty of the locality.

In the locality the school with the highest strength and attendance is the Fisheries school, Navunda, Strength 120 and attendance about 100; and this mainly caters to the need of the Fisheries children. The benign Government had the intention of raising it to the standard of an Higher Elementary school in the postwar scheme.

We assure you that with enthusiastic teachers, the strength will increase and the school will be definitely a success, if it is converted into a higher elementary school. The strength of the 5th standards of these elementary schools is all is 50 and if this Navunda school is converted into a higher elementary school these children, almost all will presecute their studies in the said school.

Since it is the only school between Byndoor and Gangolli, among the lower elementary schools that can be raised to the status of a higher elementary one, we beg of you to convert it into a higher elementary school at the earliest, before the next school year.

Annexure II

Strength and average attendance of 4 feeder lower Elementary Schools for Navunda Fisheries school.

School.	Strength.					Average attendance.				
	I	II	III	IV	V	I	II	III	Iv	V
1. Kirimanjeshwar Board Elementary school	41	37	24	14	19	25	29	21	11	16

There are at present five classes upto standard V in the Fisheries Elementary School at Navrinda and a staff of one Secondary grade and four H.E. grade teachers are working in the school. The present strength of the School is stated to be 162. The D.F. has stated that there are no higher Elementary Schools within a radius of five or six miles of Navrinda Fisheries School and that the students who Pass out of the School by Completing their studies upto V Standard sit idle at home. ~~The D.F.~~ He has stated that the financial position of the

fishermen will not permit them to make arrangements for the stay of their children at places where they could continue their high elementary education. He has therefore suggested that Standard VI may be opened in the Navanda Fisheries School during 1951-52. It is stated that there are about 4 Lower Elementary Schools in the neighbouring villages of Navanda which will serve as feeder schools if Standard VI is opened in the Fisheries School, Navanda. A strength of 25 pupils is expected in Standard VI during 1951-52. The Divisional Inspector of Schools has also accorded permission for the opening of Standard VI in the School.

Para 7 corp 3 of

an additional teacher of Higher Elementary grade may be appointed for the purpose.

C'corp 1 of

C S'corps of

The D.F. has also stated that Standards I and II of the School, which have an anticipated strength of 65 and 45 respectively during 1951-52 will require bifurcation, thereby necessitating the employment of two additional teachers of H.E. grade. Thus the Director's proposal involves the appointment of 3 H.E. grade teachers on Rs 25-45 p.m. each. The financial implication of the proposal is Rs 1200 recurring and Rs 700 non-recurring during 1951-52 and Rs 2000 recurring and Rs 700 non-recurring ultimately. This Dept supports the proposal of the D.F and recommends that necessary provision may be made in the B.E. for 1951-52.

To A.S.

This file deals with the proposal of the D,F. for the opening of standard VI in the Fisheries Elementary School, Navunda in South Kanara District during 1951-52 and to the appointment of additional staff in the school.

There are at present five classes upto standard V in the Fisheries Elementary School at Navunda and a staff of one Secondary grade and four Higher Elementary grade teachers are working in the school. The present strength of the school is stated to be 162. The D.E. has stated that there are no Higher Elementary Schools within a radius of five or six miles of the Navunda Fisheries School, that the students who pass out of the school by completing their studies upto V standard sit idle at home and that those who are keenly interested in continuing their studies will have to join the Higher Elementary schools at Kambadakone and Gangoli which are six or seven miles from Navunda. He has stated that it will be a difficult task for the students to walk such a long distance to and fro every day and that there are no proper and regular conveyance arrangements to both these places. Further the financial position of the fishermen also will not permit them to make arrangements for the stay of their children either at Gangoli or at Kambadakone for continuing their higher elementary education. The D.F. has stated that the local fishermen have also petitioned to him to raise the Fisheries Lower Elementary School at Navunda into a Higher Elementary School at an early date. It is also stated that there are about 4 lower Elementary schools in the neighbouring villages of Navunda which will serve as feeder schools

if standard VI is opened in the Fisheries School, Navunda.

In the eventof opening standard VI in the school a strength of 25 pupils is expected in the class during 1951-52. The Divisional Inspector of Schools has also accorded permission for the opening of standard VI in the Fisheries School, Navunda.

The D.F. has therefore suggested that standard VI may be opened in the Fisheries School, Navunda during 1951-52. He has also stated that standards I and II of the school, which have an anticipated strength of 65 and 45 respectively during 1951-52 will require bifurcation, thereby necessitating the employment of two more teachers of Higher Elementary grade. Thus the Director's proposals involve the appointment of 3 Higher Elementary grade teachers on Rs.25-1-45 p.m. each with a recurring cost of Rs.1,325/- and a non-recurring expenditure of Rs.700 towards books, furniture etc. The D.F. has requested that his proposals may be accepted and treated as a Part II scheme for 1951-52.

In the circumstances it is for orders whether the proposals of the D.F. to the opening of standard VI in the Fisheries School at Navunda during 1951-52 and to appoint three Higher Elementary Grade teachers on Rs.25-45 p.m. each and to incur a non-recurring expenditure of Rs.700/- may be accepted and treated as a Part II Scheme for 1951-52.

The remarks of Finance may be invited.

ASSISTANT DEPUTY SECRETARY 6231 17 OCT 1950 FINANCE DEPARTMENT

Finance (Estt Spl)

Part II Scheme for 1951-52

The proposal of the Director of Fisheries is to open the VI th standard class in the Fisheries Elementary School, Navunda, South Kanara District. The proposal involves a non-recurring expenditure of Rs 700 towards books, furniture etc.

and a recurring expenditure of Rs 2,200 p.a. by way of additional staff consisting of three H.E. Grade teachers. The cost towards addl. staff in 1951-52 will be Rs 1300 as shown at 'W' on p.6 cf.

2. The necessity for the opening of VI^th Standard in the Navanda Fisheries School has been explained in paras 2 and 3 of the report of the Director on p1 cf. The existing staff consists of 1 Secondary Grade teacher and 4 H.E. Grade teachers. With the opening of the proposed VI^th standard, and with the bifurcation of the I^st and II^nd standards (where the respective strengths expected are 65 and 45), the requirements of H.E. Grade teachers for the School in question have been estimated by the D.F. as Seven, thus necessitating the employment of 3 more H.E. Grade teachers. The non-recurring expenditure of Rs 700 has been suggested presumably with reference to the actual requirements.

3. Finance may, in the circumstances, agree to the proposals going forward as a Part II Scheme for 1951-52 subject to orders being taken in circulation including H.M. (Fin).
